Give feedback

Yes. I did a **fresh competitor audit today** of Centre for Hearing, Soft Hear, Priority Hearing, and Communiqué, looking specifically at **Gurugram hearing-aid acquisition**, not just general clinic quality.

My conclusion is quite strong:

> **Your biggest problem is not that Communiqué is inferior clinically. It is that the competitors have built a much stronger patient-acquisition and trust system around hearing aids.**

And there are several things you can fix relatively quickly.

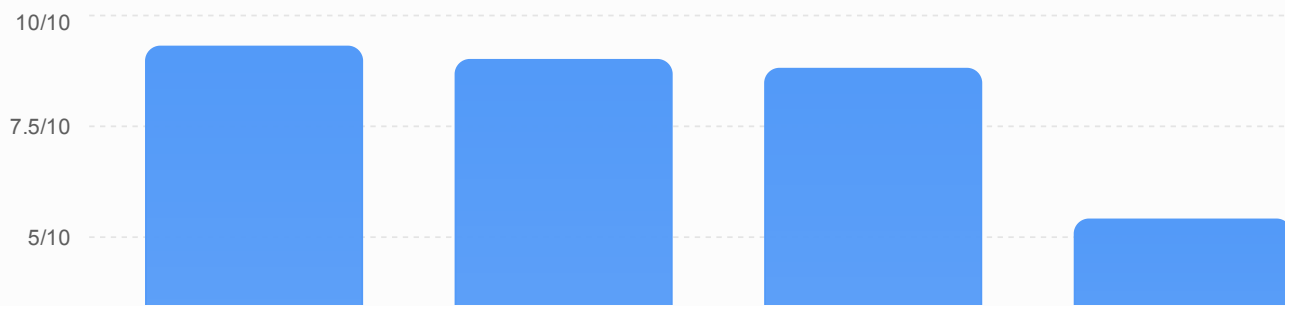

---

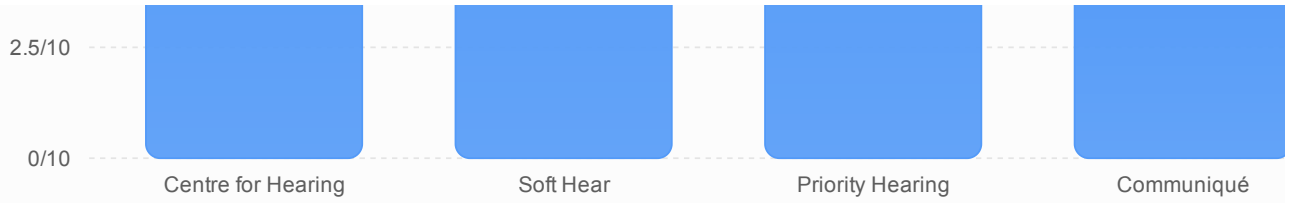

1. Executive scorecard

These are **my strategic scores**, not published ratings. They reflect what I found in their current websites, local presence, offers and marketing funnel.

Competitive marketing strength

My strategic assessment of the four clinics' current hearing-aid acquisition position, based on their visible online presence, local footprint, offers and trust signals.

Scores are strategic assessments, not clinical-quality ratings.

Area	Centre for Hearing	Soft Hear	Priority Hearing	Communiqué
Brand trust	🟢 10	🟢 9	🟢 9	🔴 4
Google/local presence	🟢 9	🟢 9	🟢 9	🔴 4
Hearing-aid positioning	🟢 10	🟢 10	🟢 10	🟡 6
Offers	🟢 9	🟢 10	🟢 10	🟢 9
Product/brand SEO	🟢 10	🟢 10	🟢 9	🔴 2
Patient proof	🟢 10	🟢 9	🟢 9	🔴 2
Convenience/network	🟢 9	🟢 9	🟢 10	🟡 5
Clinical positioning	🟢 9	🟢 9	🟢 8	🟢 9
Overall acquisition strength	**9.3**	**9.0**	**8.8**	**5.4**

The gap is **not primarily clinical**.

It is **visibility + trust + offer + proof + funnel**.

---

2. Centre for Hearing — your biggest "trust" competitor

Centre for Hearing
4.9 • Hearing aid store • Open
Website • Directions • 098112 27269

Centre for Hearing has an enormous advantage that you simply cannot reproduce overnight:

50+ years

3,00,000+ customers

98% satisfaction

4.9 Google rating

Those are prominently displayed on its website. Centre For Hea... +1

And it currently lists **three Gurugram locations**:

- DLF Phase IV
- Sector 49
- Palam Vihar

It also has a Dwarka location. Centre For He...

Their hearing-aid funnel is very sophisticated.

They show:

- hearing-aid categories
- technology levels
- indicative prices
- brands/models
- free hearing screening
- hearing-aid trial
- home visits
- lifetime aftercare
- buy-back
- EMI
- protection plans

Their current Gurgaon page even displays example price bands such as approximately ₹85,000–₹1.5 lakh, ₹1.5–₹2.5 lakh and ₹2.75–₹4.5 lakh for different technology levels. Centre For He...

What they're doing exceptionally well

They're answering the patient's questions **before the patient contacts them**.

A patient can think:

> "What does a hearing aid cost?"

They have an answer.

> "Can I try it?"

Yes.

> "What happens after purchase?"

Lifetime aftercare.

> "What if my old hearing aid is still working?"

Buy-back scheme.

> "Can someone come home?"

Yes.

That removes friction.

---

3. Soft Hear — probably the most relevant competitor for you

Soft Hear Speech Hearing and Vertigo Clinic, Gurgaon
4.9 • Speech pathologist • Open
Website • Directions • 093151 14395

This one is particularly interesting because **Soft Hear's positioning is actually quite similar to Communiqué**.

They aren't merely a hearing-aid store.

They position themselves around:

Speech + Hearing + Vertigo + Audiology + Rehabilitation.

Their Gurgaon page explicitly promotes:

- free hearing check-ups
- free hearing-aid trials
- lifetime free services
- Phonak
- Signia
- Widex
- Oticon
- Bluetooth
- rechargeable
- invisible hearing aids
- hearing-aid repair
- EMI

and says they have five Gurgaon clinics. Soft Hear +1

But here's the really important thing:

Soft Hear has built an SEO machine around individual hearing-aid searches.

For example, they have pages specifically targeting:

Widex hearing aids in Gurgaon

Resound hearing aids in Gurgaon

and individual hearing-aid products/models.

Their Widex page discusses price, trial, Bluetooth, warranty, invisible models and EMI. Soft H…

Their Resound page sells the *clinical fitting story* as well:

> scientific testing → lifestyle assessment → technology selection → customization → after-sales service. Soft H…

That's extremely important.

Soft Hear is not only selling "hearing aids."

It's capturing people who are already searching for a **specific brand**.

---

4. Priority Hearing — their biggest weapon is scale

Priority Hearing - Hearing Aid Center Green Park (Main Unit)
4.9 • Audiologist • Open
Website • Directions • 099110 04488

Priority Hearing is essentially playing the **"we are everywhere"** game.

Its current website lists clinics across Delhi NCR and Haryana, including:

- Gurgaon/HUDA City Centre
- DLF III
- Golf Course
- Manesar
- multiple Delhi locations
- Noida
- Faridabad
- Ghaziabad

and many others. Priority Hearing +1

Their current marketing highlights:

Free hearing test

Free hearing-aid trial

Lifetime after-sales service

Free senior-citizen home visits

Major hearing-aid brands

40+/75+ clinics depending on the current page

25+ years of experience

Financing/discount assistance

Priority Hearing +1

They are therefore very difficult to beat by saying:

> "We have good service."

They can say:

> "We have 75+ clinics."

---

5. Now let's look honestly at Communiqué

Communiqué Speech, Hearing & Balance Clinic

This is where I found the biggest opportunity.

Your website actually has **good clinical positioning**.

You prominently communicate:

Precision in Diagnosis, Compassion in Care

AIISH-trained specialist

Army Hospital (R&R) experience

advanced diagnostics

patient-centred care

rehabilitation

hearing + speech + vestibular + tinnitus

and you have a comprehensive service portfolio. Communiqué …

That's good.

Your clinical credibility is actually a strength.

Your website says you have:

- M.Aud.
- BASLP
- AIISH
- Army Hospital (R&R) experience
- audiology
- vestibular

- tinnitus
- speech-language pathology
- electrophysiology
- CI mapping

Communiqué …

That's considerably stronger than the typical:

> "Hearing aid dealer near me."

BUT...

Your website currently has a serious trust problem.

---

6. The biggest problem I found on your website

Your own website literally says:

> **"Placeholder reviews — real patient testimonials will be added soon."**

That is visible on the testimonials section. Communiqué …

This is **very important**.

Imagine I'm a ₹1–3 lakh hearing-aid buyer.

I visit:

Centre for Hearing

I see:

3,00,000+ customers

98% satisfaction

4.9 rating

Testimonials.

Brand information.

Multiple clinics.

Centre For He…

Then I visit Communiqué.

I see:

> Placeholder reviews.

Even though your clinical credentials may be excellent, the subconscious reaction is:

"This is a new clinic."

And that is probably one of the biggest reasons you're struggling to convert.

---

7. You are also not aggressively selling hearing aids on your homepage

Your homepage primarily says:

> Complete Hearing, Speech & Balance Care.

That's appropriate for a multidisciplinary clinic.

But **it's not ideal for a hearing-aid acquisition campaign.**

Your competitors have entire pages dedicated to:

> Hearing Aids in Gurgaon

> Hearing Aid Prices

> Phonak in Gurgaon

> Widex in Gurgaon

> Resound in Gurgaon

> Free Hearing Aid Trial

etc. Centre For Hea... +3

You need the same architecture.

---

8. This is the single biggest SEO opportunity

Right now, you should have dedicated pages for:

Hearing Aid Gurgaon

Hearing Aid Price Gurgaon

Best Hearing Aid Gurgaon

Digital Hearing Aid Gurgaon

RIC Hearing Aid Gurgaon

Rechargeable Hearing Aid Gurgaon

Invisible Hearing Aid Gurgaon

Phonak Hearing Aid Gurgaon

Signia Hearing Aid Gurgaon

Widex Hearing Aid Gurgaon

Resound Hearing Aid Gurgaon

Hearing Aid Trial Gurgaon

Hearing Aid Fitting Gurgaon

Hearing Aid Repair Gurgaon

Hearing Aid for Senior Citizens Gurgaon

Hearing Aid Near Dwarka Expressway

You don't need to spam keywords.

Each page should answer a **real patient question**.

Soft Hear is already doing this at scale. Soft H… +1

---

9. Your competitors have figured out something you haven't fully implemented

They sell the journey, not the device.

This is subtle.

A weak hearing-aid advertisement says:

> **Digital Hearing Aids — Up to 50% Off**

A better one says:

> **Find the right hearing aid for your hearing loss and lifestyle.**

And then:

Hearing test → Trial → Fitting → Follow-up

Centre for Hearing explicitly describes hearing testing and audiologist consultation before recommendation. Centre For He…

Priority Hearing similarly describes assessment → selection → fitting → follow-up. Priority Heari…

Soft Hear talks about testing, lifestyle, customization and after-sales support.

You need to make this your core proposition too.

---

10. Your discount is not your competitive advantage

This is the part I would change immediately.

You have been using:

UP TO 50% OFF

But look at what competitors are offering.

Centre for Hearing:

up to ₹30,000 off + lifetime aftercare + home visits + EMI + buyback.

Priority:

free test + free trial + lifetime service + home visit + discounts.

Soft Hear:

free test + free trial + lifetime services + EMI.

So if your only weapon is:

> **50% discount**

you're actually entering the wrong battle.

---

11. Your new offer should be this

I'd change your primary hearing-aid offer to:

FREE HEARING AID EXPERIENCE

Includes:

Complete hearing assessment

Lifestyle & listening-needs evaluation

Personalised hearing-aid recommendation

Live hearing-aid demonstration

Real-life trial

Programming & fitting consultation

No purchase obligation

Then your discount becomes a **secondary benefit**.

For example:

> **Special introductory benefits available on selected hearing aids**

Not:

> **50% OFF!!!**

That feels much more premium.

---

12. Your positioning should be different from these three

Don't try to become:

Centre for Hearing

"Big established hearing-care chain"

Don't try to become:

Soft Hear

"Large multi-location affordable audiology chain"

Don't try to become:

Priority

"Large hearing-aid network with aggressive offers"

Instead:

Communiqué = Clinical Hearing Care

Your positioning:

> **"We don't just sell hearing aids. We assess, fit, verify and fine-tune them around your hearing and lifestyle."**

That is a much stronger position for you.

---

13. Your Army Hospital + AIISH background should be much more prominent

Your website mentions it, but I don't think you're exploiting it enough.

You should have a section like:

Why entrust your hearing to Communiqué?

🎓 AIISH-trained Audiologist

M.Aud. + BASLP from All India Institute of Speech and Hearing.

🏥 Army Hospital (R&R), New Delhi

Clinical experience in one of India's leading tertiary-care hospitals.

🧪 Evidence-based assessment

Comprehensive audiological testing before recommending amplification.

🎧 Personalised hearing-aid fitting

Technology selected according to hearing loss, lifestyle and listening needs.

🔄 Long-term follow-up

Fine-tuning and rehabilitation after the sale.

This is **your competitive ammunition**.

---

14. Your local opportunity is actually excellent

Here's another major insight.

Centre for Hearing's Gurgaon locations are:

- DLF
- Sector 49
- Palam Vihar. Centre For He…

Priority lists:

- HUDA City Centre
- DLF III
- Golf Course
- Manesar. Priority Heari…

Soft Hear has locations including:

- Sector 49
- Sector 14
- Sadar Bazaar. Soft H…

But Communiqué is in:

M3M Market, Sector 113

That's a different catchment.

You should **own Dwarka Expressway/New Gurgaon hearing care** rather than trying to rank everywhere in Gurgaon.

---

15. I would change your Google Ads structure

This is probably where you are wasting money right now.

Instead of one broad campaign, I'd eventually have:

Campaign 1 — HIGH INTENT HEARING AIDS

Search terms:

> hearing aid near me

> hearing aid Gurgaon

> hearing aids Gurgaon

> hearing aid price Gurgaon

> RIC hearing aid Gurgaon

> digital hearing aid Gurgaon

> best hearing aid Gurgaon

> hearing aid shop near me

Campaign 2 — BRAND SEARCHES

Separate landing pages:

> Phonak hearing aid Gurgaon

> Signia hearing aid Gurgaon

> Widex hearing aid Gurgaon

> Resound hearing aid Gurgaon

> Oticon hearing aid Gurgaon

Campaign 3 — HEARING TEST

> hearing test near me

> audiologist near me

> hearing test Gurgaon

> audiologist Gurgaon

Campaign 4 — LOCAL/DWARKA EXPRESSWAY

> hearing aid Dwarka Expressway

> audiologist Dwarka Expressway

> hearing test Sector 113

> hearing aid Sector 113

> audiologist New Gurgaon

---

16. Don't send all those ads to your homepage

This is another major mistake I would fix.

If someone searches:

> **"hearing aid price Gurgaon"**

Don't send them to:

> Complete Hearing, Speech & Balance Care.

Send them to:

Hearing Aids in Gurgaon

Then:

What hearing aids cost

Which technology is appropriate

Available styles

Brands

Trial

Fitting

Aftercare

Book your hearing-aid consultation

That's what Soft Hear and Centre for Hearing are doing well with dedicated hearing-aid content. Centre For Hea... +1

---

17. Your Google Business Profile needs to become a machine

This is probably your most important **free** marketing asset.

Your competitors already have huge review volumes.

For example, the Gurgaon Soft Hear listing returned by local search currently shows **4.9 with 461 reviews**. Soft Hear Speech Hearing and Vertigo Clinic, Gurgaon

Centre for Hearing's Green Park listing has **4.9 with 218 reviews**. Centre for Hearing

Priority Hearing's Green Park main unit has **4.9 with 187 reviews**. Priority Hearing - Hearing Aid Center Green Park (Main Unit)

You are starting from essentially zero visible social proof.

Your first objective:

50 genuine Google reviews.

Then:

100.

Then:

200.

Don't buy reviews.

Don't manufacture them.

Build them systematically from real patients.

---

18. There is one more major issue: your testimonials

I would **remove the placeholder testimonials immediately**.

Not because the testimonials are necessarily bad.

But because your website itself labels them:

> **Placeholder reviews — real patient testimonials will be added soon.** Communiqué …

That's basically telling a prospective patient:

"We're new."

Until you have real reviews, replace that section with:

Why Patients Choose Communiqué

Then use genuine patient feedback once you have it.

---

19. Here's the funnel I would build for you

This is the biggest takeaway from the audit.

CURRENT

Google Ad

↓

Website

↓

Lead

↓

"Price?"

↓

You quote price

↓

Patient compares

↓

❌ Lost

NEW COMMUNIQUÉ FUNNEL

Google Search

↓

"Hearing Aid Gurgaon"

↓

Dedicated hearing-aid landing page

↓

"Free Hearing Aid Experience"

↓

WhatsApp / Call

↓

5-minute qualification

↓

Appointment

↓

Hearing assessment

↓

Lifestyle assessment

↓

2–3 hearing-aid options

↓

Live demonstration

↓

Trial

↓

Personalised fitting

↓

Follow-up

↓

Purchase

---

20. And I would create one very powerful guarantee

Not a money-back guarantee necessarily.

Instead:

"Don't choose a hearing aid until you've experienced it."

Then:

Try before you decide.

This directly attacks the patient's biggest fear:

> "What if I spend ₹80,000/₹1.5 lakh/₹2 lakh and don't like it?"

That's far more powerful than:

> "50% discount."

---

21. Where Communiqué can actually beat them

This is the most important part.

Competitor advantage	Can you beat it?	Your strategy
50+ years	❌	Don't compete
3 lakh patients	❌	Don't compete
75+ clinics	❌	Don't compete
Massive review count	❌ currently	Build reviews
Price	❌	Don't compete purely on price
Brand variety	🟡	Match relevant brands
Free trial	🟢	Offer it
Clinical expertise	🟢	**Own this**
Personalisation	🟢	**Own this**
Vestibular expertise	🟢	**Own this**
Complex audiology	🟢	**Own this**
AIISH credentials	🟢	**Own this**
Army Hospital experience	🟢	**Own this**

Competitor advantage	Can you beat it?	Your strategy
Convenience in Dwarka Expressway	🟢	**Own this**
Individual attention	🟢	**Own this**
Multidisciplinary care	🟢	**Own this**

---

22. My recommended positioning

If I were running Communiqué, I'd make this the core message:

Not just a hearing-aid centre. A clinical hearing-care clinic.

Then:

Test. Understand. Try. Fit. Follow up.

And underneath:

> **Personalised hearing-aid solutions backed by comprehensive audiological assessment.**

That is much harder for a discount-focused hearing-aid retailer to copy convincingly.

---

23. My priority list for you

If you have limited money, **do these in this order**:

🔴 Priority 1 — Google reviews

Get your first **50 genuine reviews**.

🔴 Priority 2 — Hearing-aid landing page

Build a dedicated, conversion-focused page.

🔴 Priority 3 — Stop using discount as the primary message

Move to **Free Hearing Aid Experience/Trial**.

🔴 Priority 4 — Google Search Ads

Focus on high-intent hearing-aid searches instead of broad traffic.

🔴 Priority 5 — WhatsApp conversion system

Don't simply answer price enquiries.

🔴 Priority 6 — 20 hearing-aid videos

Show actual products, trials, fitting, technology and patient problems.

🟠 Priority 7 — Brand-specific SEO

Phonak / Signia / Widex / Resound / Oticon.

🟠 Priority 8 — Local SEO

Own:

Dwarka Expressway + Sector 113 + New Gurgaon.

My blunt assessment

Centre for Hearing is currently beating you on trust.

Soft Hear is beating you on digital marketing and SEO.

Priority Hearing is beating you on scale and convenience.

None of those automatically means they are beating you clinically.

And that's actually good news.

Because you **cannot manufacture 50 years of history**, but you *can* build a much better acquisition funnel within 30–60 days.

The biggest mistake would be responding to this situation by simply increasing your advertising budget from ₹500/day to ₹1,000–₹1,500/day.

If your funnel is leaking, doubling ad spend just doubles the leakage.

Your immediate target should not be "more leads."

It should be:

Qualified hearing-aid leads → appointments → trials → purchases.

Once we get that conversion system working, **then** we scale the advertising.

If you want, my next step would be to go **much deeper into your actual Google Ads problem**: I can build you a **Communiqué vs these 3 competitors Google Ads battle plan**, including **exact campaign structure, keyword groups, negative keywords, ad headlines, ₹500/day allocation, landing-page structure, WhatsApp response flow, and the numbers you should expect at each stage**.

Shiamgir • Use precise location
